

RED RIVER OIL POOL EXTENDED

Wichita Falls, Texas, Jan. 22.—The first extension of the Red River oil pool, which was opened by the General Oil company's No. 1 Roberts well, has just been made by the Hightower Oil company's No. 1 Roberts well. It was shut down for several weeks owing to weather conditions. The drillers are drilling the well at present indications for a good pool.

In this same district the No. 1 Roberts of the McDowell and Clive, 1800 feet northwest of the General well, is in the sand and operations are being made to complete the well. It is less than 1000 feet from this well to the Hightower Oil company's No. 1 Roberts.

The Shreve and Fisher well, in Tillman county, promises to rival any recent well in the Red River pool. This well is expected to be completed within the present week. It has been delayed by weather conditions.

In the Burk Burnett pool the Armstrong Oil company's No. 1 H. Willis is attracting attention. This well is encountered an oil bearing stratum at a depth of 1325 feet. The drillers believe this well will open up a new pool.

Oil Firm Plans Thorough Tests In New Mexico

Santa Fe, N. M., Jan. 22.—With 1,000,000 acres of land now under lease in New Mexico, Frank Thompson and associates, of the Mid Continent Oil, Gas and Refining company, at Kansas City, are in New Mexico to make a thorough test for oil. Within 30 days their land holdings will be increased to 2,000,000 acres, and not less than 10 deep test wells will be drilled this year. Mr. Thompson declared today.

He said his company will spend not less than \$1,000,000 in an effort to produce oil in New Mexico.

In the party are: Frank Thompson, president; W. S. McMillen, attorney; C. L. P. Martin, assistant to the president; and Henry J. O'Connell, geologist.

This is the company which recently leased 75,000 acres of land from the Santa Fe and Rio Grande railroad. Mr. Thompson says his company, in its preliminary study, has spent \$50,000 and completed more data on New Mexico than the Standard Oil company or any of its subsidiaries. In discussing future operations in New Mexico, he says he means to profit by his experience in other fields. He explained that he was one of the first to the Ranger, Burk Burnett and Louisiana fields.

OIL PROSPECTS GOOD AT MARFA

Marfa, Texas, Jan. 22.—The Ajax Texas company, drilling a test well two miles southeast of Marfa, lost one of its large drilling bits and though the fishing job proved a most tedious one, the expertness of the workmen and modern tools solved the problem. The drillers are at present approximately 1000 feet down on a guaranteed 1000 foot test. So far, indications encountered are most favorable and both the Ajax company and Petroleum Engineers are becoming enthusiastic. Large gas wells were struck in this section some years ago, during the drilling of several hundred thousand acres have already been made, and representatives of large oil and drilling companies are either looking things over, or are camping on the ground in numbers.

Several large leases have been made within the past two weeks at from \$1 up. One company has sold numerous 25-acre leases from a large ranch, about eighteen miles from the railroad and development, at \$12.50 per acre.

FIRST WELL IN TILLMAN COUNTY, OKLA., IN PAY SAND
Wichita Falls, Texas, Jan. 22.—Operators are greatly interested in the progress of the Curtis Mound Oil company's test in section 14-4-15, Tillman county, Oklahoma. Indications for a producer are good. The oil bearing strata was picked up at 1475 feet. After the drill had passed through nine feet of a hard rock formation, the last two feet of which showed indications of gas. With the drill eight feet in the sand, the well is shut down for casing. According to the head driller the sand picked up in this well is exactly the same as that found in the Burk Burnett district.

This is the first well in Tillman county to strike the pay. A number of other wells are reported as being at interesting depths. Possibility of another well in a few days is very good in the 25 Shagor, land, which is 1600 feet deep.

An oil and proving a new shallow field has been found in the Joplin-Hurk well in Archer county. This is the company's second well on this tract. The first well struck the sand at 700 feet.

VULCAN OIL CO. GETS 2000 BARREL WELL IN STEPHENS
Banger, Texas, Jan. 22.—The Vulcan Oil company has a 2000 barrel well on the Nannie Walker land in Stephens county, two miles east of Banger. It struck production at 2575 feet. The well is in section 6, block 6. The well is four miles south of the Gulf Production company's Crowley well, which came in three weeks ago with 5000 barrels.

Other new wells in the Ranger field are: Alberts Oil company, No. 2 Roper, 1600 barrels; Chapman et al. No. 2 Wright, 100 barrels; Gladstone Oil and Refining company, No. 5 Wright, 1600 barrels; Prairie Oil and Gas company, No. 17 Roper, 40 barrels; No. 17 Meyers, 350 barrels; No. 2 Roper, 500 barrels; Humble Oil and Refining company, state land, 120 barrels; Chasman and Walker, No. 2 Roper, 200 barrels.

STATE TO SELL LEASES ON TULAROSA BASIN ACREAGE
Santa Fe, N. M., Jan. 22.—Oil leases on 57,000 acres of land in the Tularosa basin will be sold at public sale April 12, according to state land commissioner N. A. Fields. The land is nearly all situated in Otero county. The E. T. Willis well in Wilcox creek field of Otero county is reported down 1200 feet.

NEW 700 BARREL WELL IN OKMULGEE COUNTY, OKLA.
Tulsa, Okla., Jan. 22.—A 700 barrel well has been completed by the Tulsa Oil company, south-west of Okmulgee in Okmulgee county. In this same district the White Phillips oil well on the A. T. Tabor land is making 450 barrels of oil a day.

An 18,000,000 foot gasser has been brought in by the Mid-Co Petroleum company in Cossau county. This company also has a 500 barrel well among its latest completion in this district.

A 400 barrel well was completed several days ago by the Indian Territory Illuminating Oil company in Cossau county. This is the company's first completion in this district.

KING EIGHT STOCKHOLDERS GET NOTICE OF DIVIDEND
Local stockholders of the White Cloverine Oil company have received notice that another dividend will be paid on February 1 to stockholders of record January 4. This is the company's third dividend.

OIL SAND NEAR SINTON.
Sinton, Texas, Jan. 22.—An oil sand has been picked up in the Sinton well No. 1, three miles north of Sinton. A strong gas pressure has also been found in this test. Visitors are daily coming to the well and excitement is high in that vicinity.

"Hercules of the Southern Oil Fields"

THE MIGHTY TRINITY OF OIL

Production—Refining—Distribution

AMERICAN OIL AND REFINING COMPANY'S PLANS AND PURPOSES, ANNOUNCED NOVEMBER 9, 1919, include this statement: "This company is entering the oil and refining business in a big way. It will follow and manage every phase of the business from production to marketing of products."

THE BANKING SIDE OF OIL

BEGINS WHEN THE OIL RUNS INTO THE TANKS OF THE REFINERY, and is followed by few of the companies you see advertised today. AMERICAN began with production, accumulated 22 leases in proven and prospective fields and more than doubled its holdings during the first two weeks of its sale at par. Included in these increased holdings are tracts 8, 9, 10 and 11, surrounding HOMER'S RICHEST PRODUCTION, on one of which, 8, the drill is preparing to go down NOW. This lease is one of the three sure shots included in the drilling campaign of the company, now being crowded.

OUT OF FIVE COMPLETIONS MADE IN HOMER FIELD LAST WEEK AMERICAN TRACT 8 IS VERY CLOSE TO FOUR OF THEM

So far, the promises of the officers of AMERICAN OIL AND REFINING COMPANY have been fulfilled—and then some. You may put full reliance in the completion of their plans.

BECAUSE

These Men Are On the Job Every Minute
They Will Follow Every Phase of the Business
The Assets Spell Victory For the Enterprise

These are the reasons AMERICAN Par \$1 stock is nearly all gone.

"Production From the Start"

WHITE CLOVERINE SALVE

Cover Bruises At Once

A BRUISE often causes an abrasion of the skin. Germs can then enter and find plenty to thrive on.

To prevent infection, to soothe and to hasten healing, rub on a little White Cloverine Salve.

It is highly recommended for Burns, Fleets, Tetters, Eczema, Ulcers, Haemorrhoids, Sunburn, Catarrh, Chafes, Itch, Poisoning, Sore Throat, Chapped Hands and Lips, etc.

Practically every druggist in America sells White Cloverine Salve and you should be able to obtain it easily. If your druggist has none, have him order for you. Or send 25c to us and we will mail a box direct, prepaid.

- Beauty Chats -
By EDNA KENT FORBES

An Enemy Of Beauty.

THE woman who reads this will probably think immediately of beauty. But the one I want to talk about particularly today is the growth of hard skin on the face and the loss of the soft, youthful complexion.

For no woman can be beautiful if her feet hurt her or if she has to wear out-of-shape shoes in order to be moderately comfortable.

"Curing" a well known physician says, "are an abnormal localized thickening of the epidermis occurring more often on the feet, but they may also be found on the hands. These corns on the feet are produced by anything causing continual pressure or friction, as tight or ill-fitting shoes."

So you may judge from this that these shoes are often quite a responsible cause for the corn. The best way to treat a corn at home is to soak the foot in warm water until the dead skin is soft and then rub it off with a corn file which comes for the purpose. If you are very ready of hand, shave off the dead skin with a very sharp knife blade. When you have removed as much of the tough, dead skin as possible, rub the spot with cold cream or oil and place over it a small pad made from a bit of thin felt with a very small hole cut in the center. You will find these home-made corn pads much more effective than those you purchase ready made, for the ready made ones have such a large hole cut in them that they frequently push the skin up in the center and encourage the formation of a new and larger corn.

You may or druggist will give you various valuable lotions to use on the feet. Most of them contain salicylic acid and ethylalcohol.

Answers to Questions.
Bobbie—If the shape of your chin is due to some malformation of the jaw, a great deal might be done to improve it by the process called orthodontia, which any good dentist can advise you of.

F. A. G.—I would advise you to take your daughter to the best physician you can find as soon as possible and have her treated for the multiple fits.

Troubled—From the description of your face, I should judge that the best way to fix your face would be to fluff it over the forehead and at the sides. This would fluff out the face and make it appear less long and thin. Fluff it by making a soft knot quilt high on the back of the head. The fluff "rolls" and the stiff "rolls" are unbecoming to almost every type of face.

Grow Your Hair FREE RECIPE

After being almost totally bald a New York business man grew hair—and now has a profuse growth of hair—and now he will send the genuine recipe free on request to any man or woman who writes to overcome baldness or thin hair growth. On testing box of the preparation, Kettie, will be mailed with recipe for you. Send 10 cts. or if you prefer, Kettie will be mailed with recipe. His address is John H. Brinkley, 47-301, Station K, New York, N. Y.

"The Chance"

Every Investment, in a greater or less extent, is speculative—that men who have taken

are the leaders in the world finance today is well known.

That the element of speculation enters into every transaction in oil, is well known.

The investor should, by careful investigation, determine just how much of the speculative element has been eliminated.

THE HOMER-DETROIT OIL CO.

are in the heart of proven fields—surrounded by producers—Read descriptions of our holdings in our descriptive ads or send for circulars.

The company's affairs are in the hands of men who are well known whose honesty and ability have never been questioned. The HOMER-DETROIT offers an investment promising large returns, and a square deal to the small as well as the large investor.

206 PLEAD NOT GUILTY IN BISBEE DEPORTATION CASE

Tumbeston, Ariz., Jan. 22.—Mill-litine mine owners, shift bosses, ex-shariffs and deputies, laborers and others to the number of 206, residents of the Warren mining district, pleaded not guilty to charges of hindering a superior court of Cochise county yesterday. The charges are the result of the alleged participation of defendants in the deportation of 1100 I. W. W. members and their sympathizers from the district July 12, 1917.

The defendants were arraigned before Judge Samuel L. Patton, of Pima county, Judge A. C. Lockwood, of Cochise, having been disqualified. Defendants were represented by W. H. Burges, of El Paso, and Frank Curley, of Tucson. By agreement it was decided to call first the individual cases, following which action on a blanket indictment containing more than 150 names, will be taken. The entire list of prospective jurors in the county had been ordered drawn by the court. Drawing will begin February 2 and it is calculated 2000 prospective jurors will be available.

Louisiana Acreage 15 UNITS 15

IN THE PAROCH BULL BAYOU FIELD

—DE SOTO PARISH

We are forming a syndicate for the purpose of acquiring the acreage described below: 20 units constitute the entire tract; 15 units have been disposed of and 15 remain for sale. The property is in four different locations, and the titles have been approved.

This is a speculation with the strong possibilities of good substantial profits. If you are inclined to take a chance you will find this to be the most promising and flattering opportunity yet offered in this city. Quick action is necessary. Units are offered at \$200.00 each.

120 Acres in 4 Tracts

FORTY ACRES
Section 4, Township 11, Range 14—2-year lease—OFFSET TO HARMAN NO. 2. NOW DRILLING AT 800 FEET.

FORTY ACRES
SECTION 3, Township 11, Range 15—2-year lease.

TWENTY ACRES
Section 25, Township 12, Range 15—2-year lease.

TWENTY ACRES
Section 25, Township 11, Range 15—2-year lease. WITHIN TWO MILES OF BOONE OIL COMPANY'S BIG WELL.

We have 120 acres at \$50.00 per acre, total value \$6,000.00, for which we are to pay for by the money derived from the thirty units. We do not claim that this acreage will set a fortune. We note above the locations of the property, and present it as an unusually good business opportunity. However, we do not want anyone to invest who can't afford to lose, or who is not familiar with business propositions of this character.

After the 30 units are fully subscribed for, two or more trustees will be elected by the unit holders to represent us in the field.

Make checks payable to the undersigned. It is permissible to write on check for one unit.

"One-thirtieth undivided interest in the above described property."

MAIL YOUR CHECK TODAY.
